

# PUBLIKATIONSLISTE PROF. DR. THORSTEN KÖHLER

Stand: Januar 2011

Köhler, T.: Quantum jumps in hydrogenlike systems. In: Phys. Rev. A 54 (1996). 4553.

Köhler, T.: Coherence with incoherent light in hydrogen-like systems. In: Z. Phys. D 38 (1996). pp. 321-326.

Hegerfeldt, G.C., Köhler, T.: Atomic versus molecular diffraction: Influence of breakups and finite size. In: Phys. Rev. A 57, 2021(1998).

Hegerfeldt, G.C., Köhler, T.: Few-Body Approach to Diffraction of Small Helium Clusters by Nanostructures. In: Proceedings of the 16th European Conference on Few-Body Problems in Physics, June 1-6 1998, Autrans, France. eds. Desplanques, B., Protasov, K., Silvestre Brac, B., Carbonell, J.. Few-Body Systems Suppl. 10 (1999). pp. 263-272.

Hegerfeldt, G.C., Köhler, T.: Theoretical challenges in atom optics: Atomic and molecular diffraction by transmission gratings. In: Proceedings of the International Symposium: New Insights in Quantum Mechanics (Goslar, September 1998). eds. Doebner, H. D., Ali, S. T., World Scientific, Singapore.

Grisenti, R. E., Schöllkopf, W., Toennies, J.P. u. a.: Determination of atom-surface van der Waals potentials from transmission-grating diffraction intensities. In: Phys. Rev. Lett. 83, 1755 (1999).

Hegerfeldt, G. C., Köhler, T.: Deviations from classical optics in matter diffraction and determination of the size of weakly bound molecules. In: Phys. Rev. A 61 23606 (2000).

Hegerfeldt, G. C., Köhler, T.: How to study the Elusive Efimov State of the  $4\text{He}_3$  Molecule through a New Atom-Optical State-Selection Technique. In: Phys. Rev. Lett. 84, 3215 (2000).

Grisenti, R. E., Schöllkopf, W., Toennies, J. P. u. a.: Determination of the Bond Length and Binding Energy of the Helium Dimer by Diffraction from a Transmission Grating. In: Phys. Rev. Lett. 85 (2000). 2284, see also: Physical Review Focus, story 9, 6 September 2000.

Grisenti, R. E., Hegerfeldt, G. C., Köhler, T. u. a.: Quantentheorie der Materiewellenbeugung (Quantum Theory of matter-wave diffraction). In: Physikalische Blätter 56, Nr. 11, 53 (2000).

Hegerfeldt, G. C., Köhler, T.: Quantum Effects in Matter-Wave Diffraction, Proceedings of "Quantum Theory and Symmetry" (Cracow, July 2001). eds. Kapuscik, E., Horzela, A., World Scientific, Singapore.

Köhler, T.: The role of the initial state in the collapse of a Bose condensed gas. In: J. Phys. B: At. Mol. Opt. Phys. 34 L543-L549 (2001).

Köhler, T., Burnett, K.: Microscopic quantum dynamics approach to the dilute condensed Bose gas, Phys. Rev. A 65, 33601 (2002).

Brühl, R., Fouquet, P., Grisenti, R. E. u. a.: The van der Waals potential between metastable atoms and solid surfaces: Novel diffraction experiments vs. Theory. In: Europhys. Lett. 59 (3) (2002). pp. 357-363.

Köhler, T.: Three-body problem in a dilute Bose-Einstein condensate, Phys. Rev. Lett. 89, 210404 (2002).
