

# Forschungsfeld Safety und Security

## Ausgewählte Veröffentlichungen

- [1] C. Paar, J. Pelzl, Understanding Cryptography - A Textbook for Students and Practicioners, Springer Verlag, ISBN 3642041000, December, 2009. <http://www.cryptotextbook.com>
- [2] J. Pelzl, IT-Sicherheit im Automobil: Existierende Lösungen und neue Ansätze, in Sicherheit und Vertrauen in der mobilen Informations- und Kommunikationstechnologie, U. Bub, K. Wolfenstetter (Hrsg.), Vieweg+Teubner, GWV Fachverlag GmbH, 2009, Berlin, Germany.
- [3] M.Wolf, J.Pelzl, Airborne Stuxnet? IT Security Threats for Modern Computerized Aircrafts, Avionics Europe Conference, March 21st-22nd 2012, Munich, Germany.
- [4] M.Küster, J.Pelzl, Manipulationsschutz vernetzter Sicherheitssysteme durch IT-Sicherheit, Workshop, Innosecure Velbert, September 25th - 26th, 2013, Velbert/Heiligenhaus, Germany.
- [5] J.Pelzl, Anforderungen und Lösungen für Sicheres Smart Metering, ConLife 2012, June 28th, 2012, Cologne, Germany.
- [6] J.Pelzl, Organization and Moderation, Introduction to Industrial Cryptography and IT Security Embedded World Conference, February 28th, 2012, Nuremberg, Germany.
- [7] J. Pelzl, Automotive Embedded Security - Challenges and Chances, SIAT Symposium on International Automotive Technology January 9th-11th, 2013, Pune, India.
- [8] J. Pelzl, Schutz vor möglichen Eingriffen und Risiken – Vertrauenswürdige Software, 12. EUROFORUM Jahrestagung Software im Automobil, May 14th - 15th, 2012, Stuttgart.
- [9] J. Pelzl, Moderation, TeleTrust-Informationstag 'Das Automobil als IT-Sicherheitsfall, May 11th, 2012, Berlin.
- [10] J. Pelzl, Eingebettete Sicherheit in der Medizintechnik, Anforderungen an IT-Sicherheit und Datenschutz bei Medizinprodukten. Nürnberger Medizinproduktkonferenz, TÜV Rheinland Nuremberg, Germany, March 22nd, 2012.
- [11] F. Zideg, R. Krenz-Baath, E. Larsson: Upper-Bound Computation for Optimal Retargeting in IEEE 1687 Networks. ITC 2016.

- [12] S. Eggersglüß; K. Schmitz; R. Krenz-Baath; R. Drechsler: On Optimization-based ATPG and its Application for Highly Compacted Test Sets. IEEE Transactions on Computer-Aided Design of Integrated Circuits and Systems (TCAD), 2016.
- [13] F. Ghani Zadegan, R. Krenz-Baath, E. Larsson: Retargeting Challenges in IEEE 1687 Networks, Test Standards Application Workshop (TESTA'16).
- [14] R. Krenz-Baath, F. Zadegan, E. Larsson:  
Access time minimization in IEEE 1687 networks. ITC 2015.
- [15] C. Scholer, R. Krenz-Baath, A. Murshed, R. Obermaisser:  
Optimal SAT-based scheduler for time-triggered networks-on-a-chip. SIES 2015: 156-161
- [16] R. Krenz-Baath, A. Glowatz, F. Hapke: Multi-targeting boolean satisfiability-based test pattern generation. US Patent 8,689,069, 2014.
- [17] F. Zadegan, E. Larsson, A. Jutman, S. Devadze, Rene Krenz-Baath: Design, Verification, and Application of IEEE 1687. ATS 2014.
- [18] S. Eggersglüß, K. Schmitz, R. Krenz-Baath, R. Drechsler: Optimization-based multiple target test generation for highly compacted test sets. ETS 2014.
- [19] F. Hapke, J. Schloeffel, M. Wittke, R. Krenz-Baath: On-chip logic to log failures during production testing and enable debugging for failure diagnosis: US Patent 8,423,845, 2013.
- [20] R. Krenz-Baath, A. Glowatz, F. Hapke: Fault collapsing of multi-conditional faults. DDECS 2013.
- [21] J. Pelzl, „Automotive Risk Assessment“. escar - 16th Conderence on Embedded Security in Cars, Nov. 2017, Berlin, Germany.
- [22] J. Pelzl, „Intrusion Detection and Prevention Systems for Industrial Applications“. 2. Jahrestagung: IT-Sicherheit in Produktion und Technik, 12. – 13. September 2017, Berlin.
- [23] J. Pelzl, „Safety und Security für Industrie 4.0“. ASQF Safety & Security Night, 30. August 2017, Wiesbaden.
- [24] A. Lorengel, J. Pelzl, „Making Medical Devices Reliable: Analysis and Implementation of a Secure Software Update“. In 2nd YRA MedTech Symosium, Young Researchers Academy – MedTech in NRW, jointly held with the IEEE Workshop & SENSORICA 2017, Hochschule Ruhr West, June 8-9, Mülheim a. d. Ruhr, Germany, 2017.
- [25] J. Pelzl, „Tutorial: Intrusion Detection and Prevention Systems for Automotive“. Automotive – Safety & Security 2017: Sicherheit und Zuverlässigkeit für

automobile Informationstechnik. Gesellschaft für Informatik, 30. – 31. Mai 2017, Stuttgart, Germany.

[26] J. Pelzl, N. Ricchizzi, 5. CYBICS Konferenz - Digitalisierung meets Cyber Security, "Risk Assessment - Sicherheit in der Automation", 19.-20. September 2018, Bochum.

[27] J. Pelzl, „Foundations of Automotive Cyber Security“. escar - 17th Conderence on Embedded Security in Cars, 13. November 2018, Brussels, Belgium.
